Trailer Lighting

Product Features

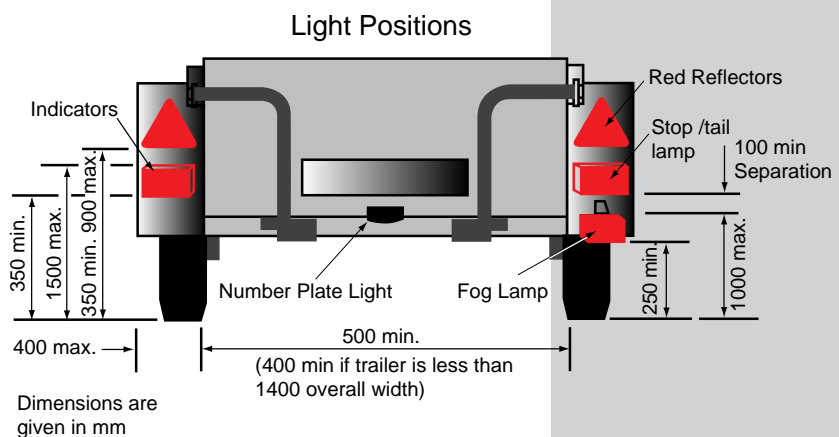

- All lamps are spade terminal.
- Bulbs fitted to all lamps.
- Clip-on lenses cannot rust.
- Cables manufactured to BS2941X

AL-KO now has a complete range of trailer lighting and electrical components to give the Trailer Manufacturer the widest choice to suit every application. There are now AL-KO lighting combinations ranging from the basic legal UK requirement to the most comprehensive overseas standards. Whatever your market AL-KO can provide the system. As with all AL-KO components they are readily available from stock. The AL-KO range offers 3 & 4 function rear lamp combinations, separate fog and number plate lights. All lamps use spade terminals and are fitted with bulbs. Other products include reflectors, cables, plus connectors and clips together with 7 pin plug socket, and plug holder.

The AL-KO range is fully comprehensive. For trailers over four metres in length we supply the necessary front markers and for those over six metres we supply the required side markers. See overleaf for full technical range.

And it doesn't end with taillights. AL-KO supplies virtually all mechanical components necessary to build the finest trailers on the market today.
